

How to Set Overlay for a Specific Page

You can set a pop-up for a specific page by following these steps:

1. Click on the **Campaigns** category on the left side of your screen.
2. Click the **Details** link of the campaign you wish to edit.
3. Enter the page URL in the **Base Url** field. Check *Apply to all site*. Add parameters for URLs you want to show the popups to.

CAMPAIGN SETTINGS

Name	<input type="text" value="picreel"/>
Base Url 	<input type="text" value="http://www.my_site.com"/>
	<input checked="" type="checkbox"/> Apply to all site 
Exclude URLs 	<input type="text" value="user=existing,hidepopup"/>
Include URLs 	<input type="text" value="blog"/>
Impression frequency 	<input type="text" value="Everyday"/>
Timed popup 	<input type="text" value="seconds"/>
Device type 	<input type="text" value="All"/>
	<input type="checkbox"/> Exclude Base Url from Timed popup

In this example, the popups will be shown only on "blog" pages of your website.
