

Why Can't I See the Overlay Again When the Campaign Is Set Up Correctly?

If you take action toward a pop-up, you won't see it again in the same browser earlier than impression frequency allows. The reason is that your activities are saved in cookies.

If you would like to see the pop-up again, please,

1. Delete cookies,
2. Restart your session in a different browser, or
3. Use the Incognito Mode in Chrome.
