

How to Set up a Mobile Campaign in Picreel

Picreel facilitates an easy mobile pop-up campaign set up to help you target mobile customers in a user-friendly way.

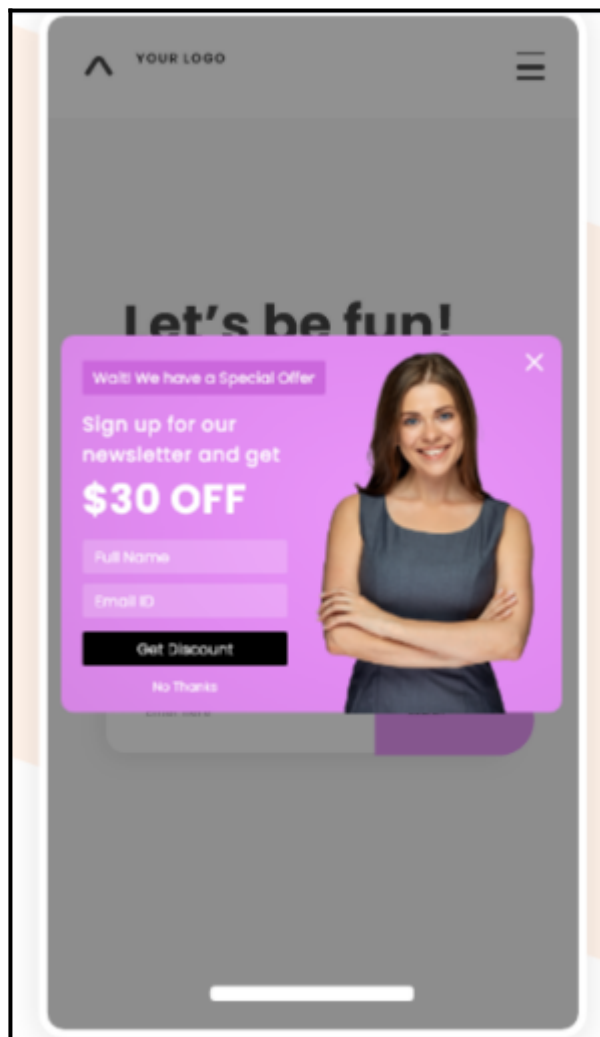

Watch this quick **video** to learn how to create a mobile pop-up campaign in Picreel in minutes.

Or **continue reading** to learn it step-by-step.

By setting up mobile campaigns, you can:

1. **Expand** the reach of your campaigns
2. **Increase** customer retention and conversion rates

Here's what a mobile overlay will look like:

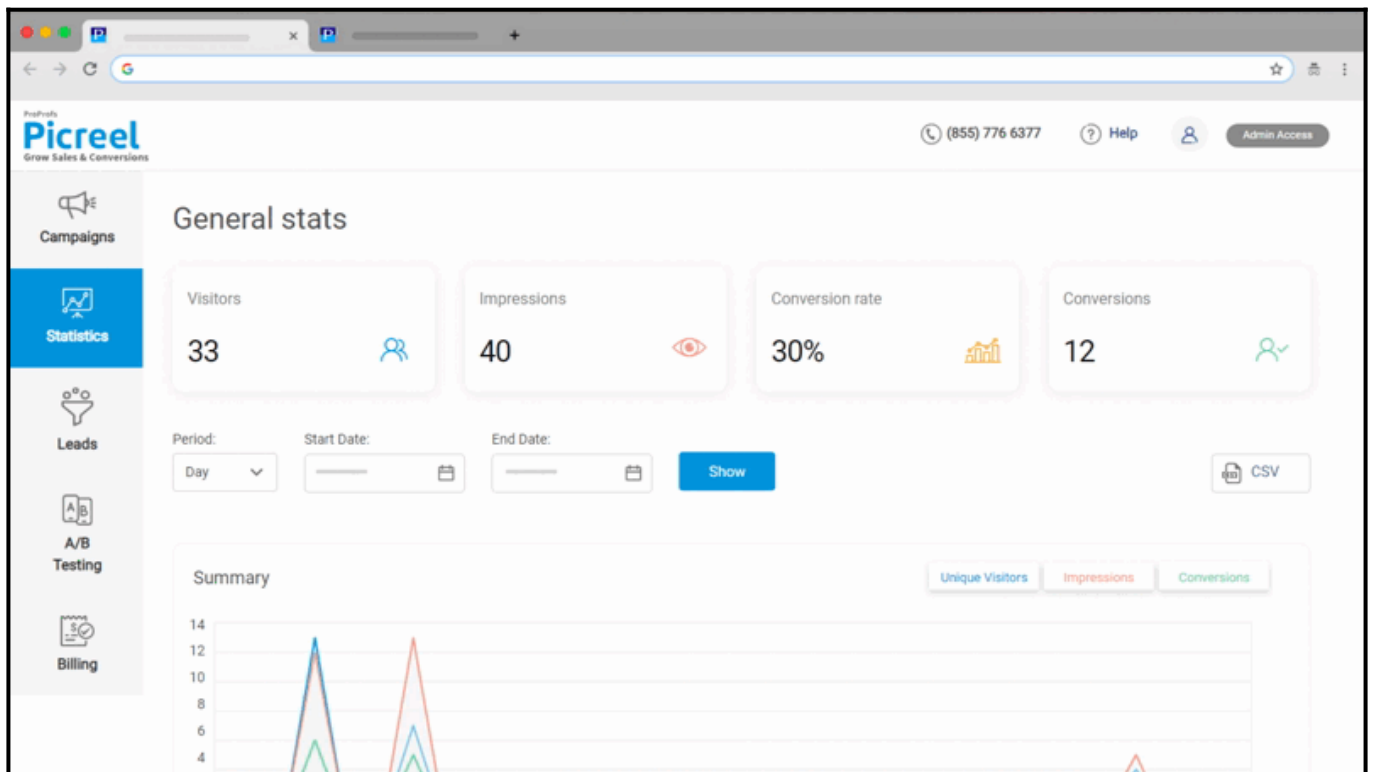

To set up a mobile pop-up campaign in Picreel:

Step 1: Creating a New Campaign

In your Picreel account,

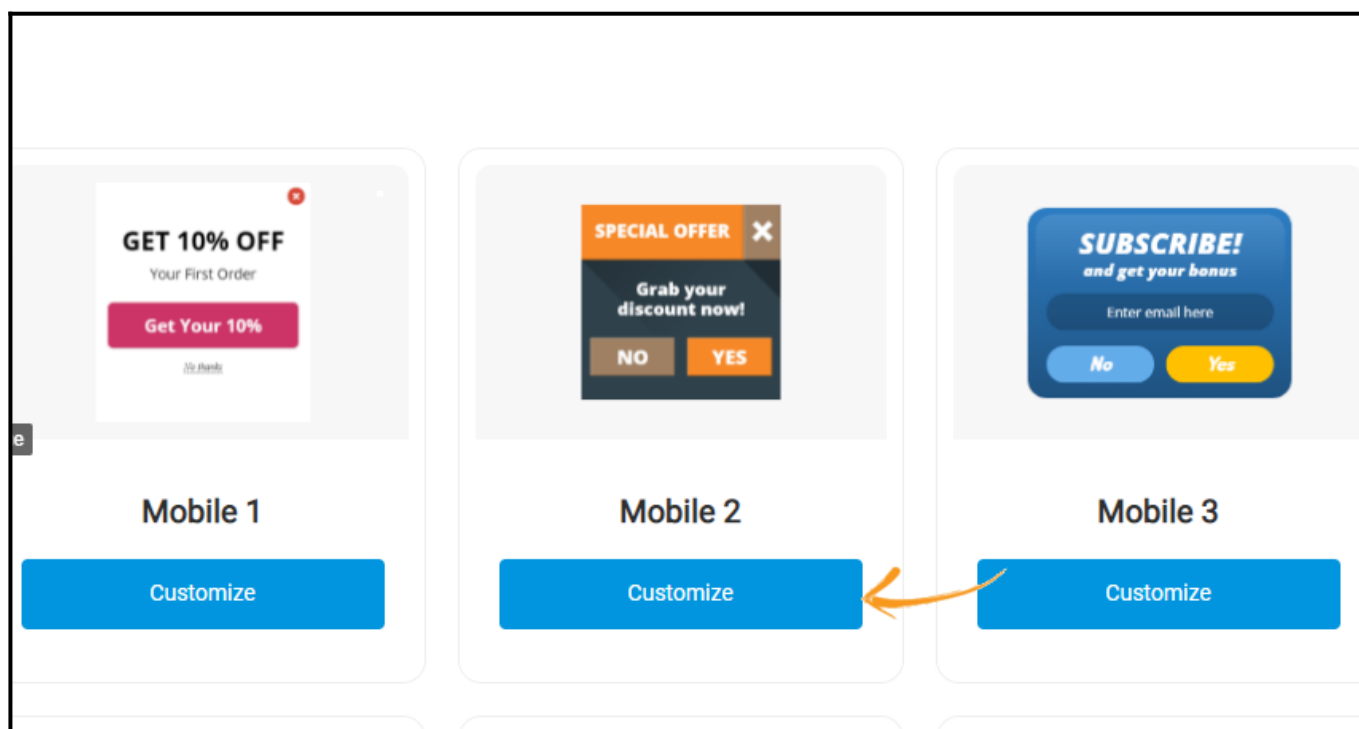

- Navigate to '**Campaigns**' from the dashboard
- Click on the '**Add Campaign**' button on the top-right of your screen.

Note: If you are a first-time user, navigate to 'Get Started' and click on 'Create your design.'

Step 2: Selecting the Overlay

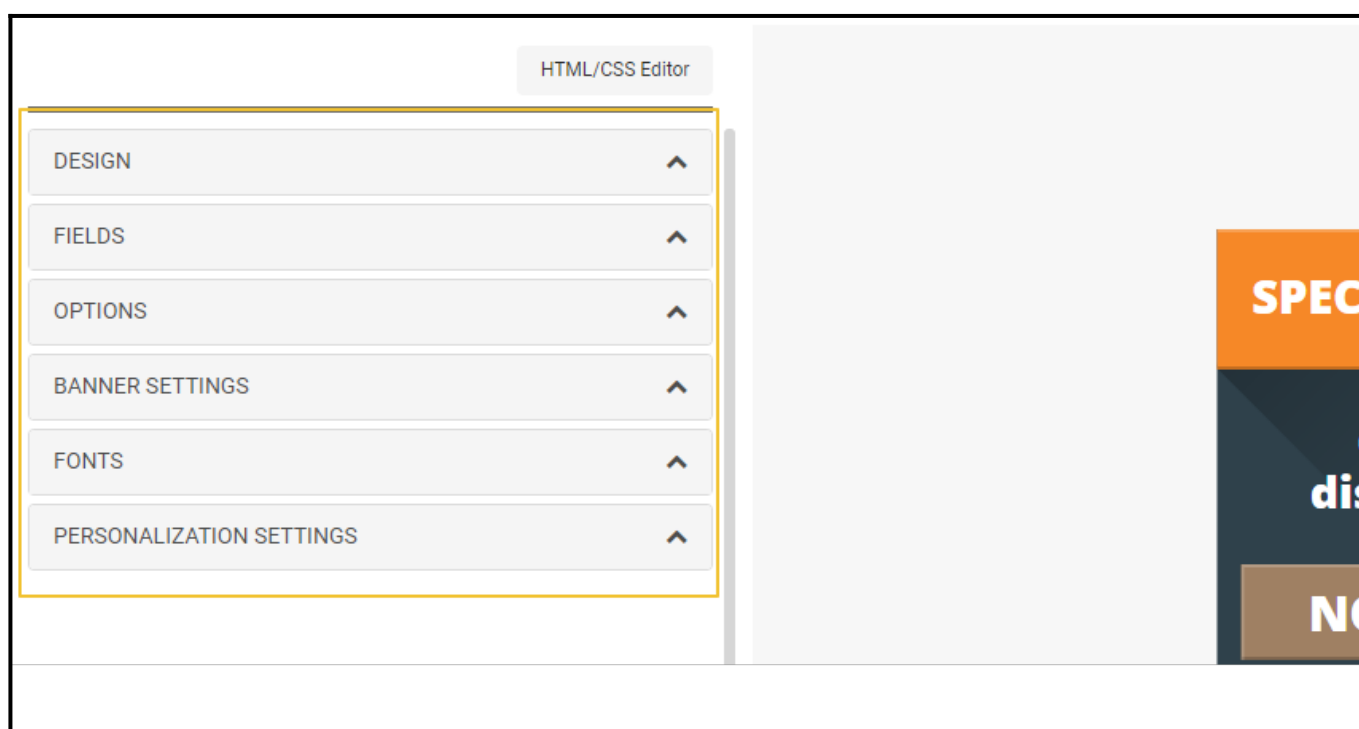

- Choose 'Mobile' in the 'Select Overlay' menu.
- Select a **template** by clicking on 'Customize.'
- You will be automatically redirected to the 'Edit Design' section.

Step 3: Customizing the Template

- You can **modify** the default overlay according to your requirements.

Here are the following elements you can edit:

Design

You can easily change the background color, text color, and heading colors.

Fields

You can change the overlay text by editing the respective fields.

Options

You can set up action after the user's response to the pop-up and choose to show a message for the

desired time. You can also select pop-up animation as well as decide the position on the screen. You may choose to hide the close button of a pop-up.

Fonts

You can select from a range of font styles and also modify their size.

Advanced modifications - Customizing your offer.

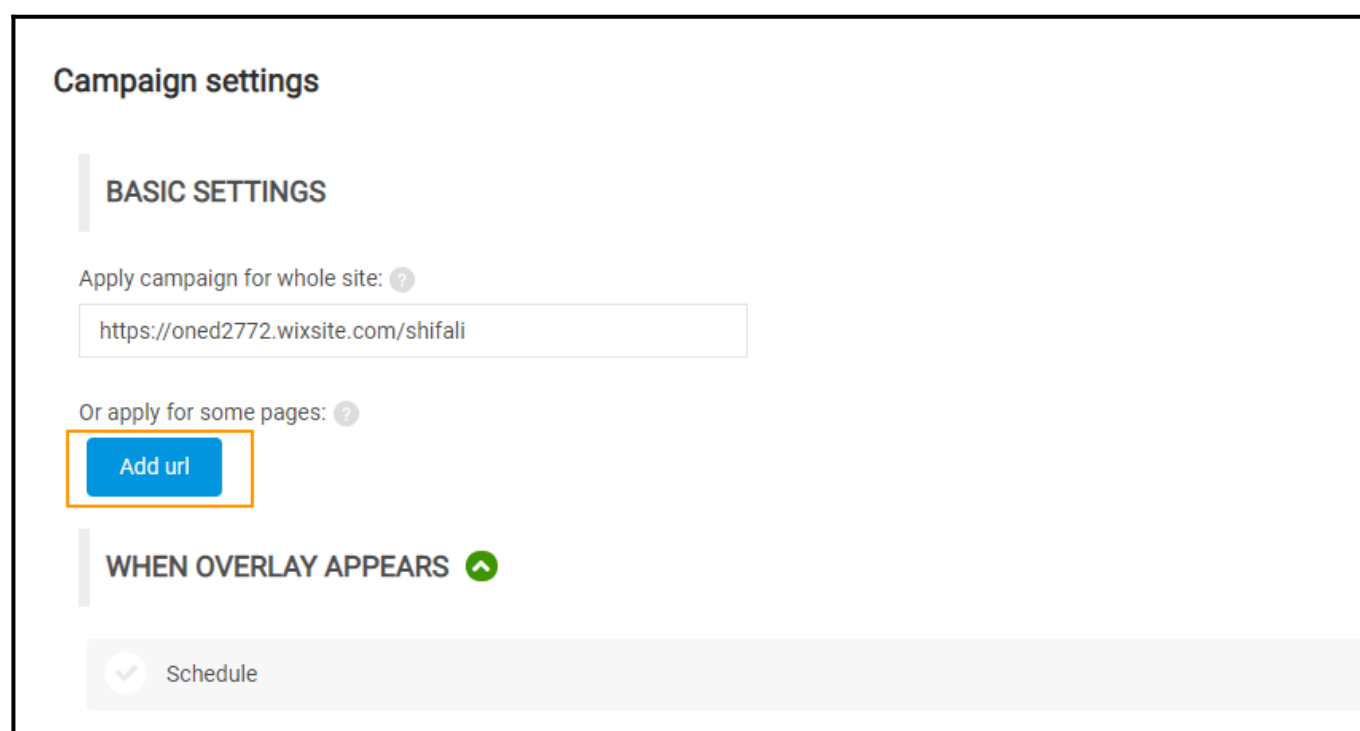

To access advanced modifications of the offered designs, please, click on HTML/CSS Editor. Here, you may add additional fields and buttons.

- Click the **'Save'** button at the top of the screen.

Step 4: Managing Campaign Settings

Next, on the **'Target Campaign'** page,

- Insert the URL where the offer should be active. You may apply for it [entire website](#) by inserting the link into the **'Apply campaign for the whole site'** field.
- Alternatively, you may activate or deactivate the campaign on a [specific page\(s\)](#) by clicking the **'Add URL'** button.

BASIC SETTINGS

Apply campaign for whole site: ?

Or apply for some pages: ?

Add url

WHEN OVERLAY APPEARS ^

☒ Schedule

- Click the green arrow next to the **'WHEN OVERLAY APPEARS'** to modify targeting options.
- Under **'Trigger Options,'** adjust the settings to choose when the overlay appears.

WHEN OVERLAY APPEARS

✓ Schedule

✓ Trigger options

Disable triggers if a user spent less than seconds on your site.

Note, that the option disables two triggers, On Exit offers and After scrolling down "X" percent.

✓ On Exit

Status

Active

Exit Offers Sensitivity

Low

It sets how likely the overlay will fire on Desktops. High means that it has the most sensitive appearance.
Medium - in the middle.
Low - the least sensitive appearance.

- Check **‘Exclude homepage from the timed popup’** if you do not want to show the overlay on your homepage.

✓ After 'X' second(s)

Status

Inactive

Popup will appear after second(s)

☐ Exclude homepage from timed popup

It sets when the overlay is displayed on mobile and tablet devices. Choose the number of seconds that users must spend on your site to see the overlay.

✓ After scrolling down 'X' percent

Status

Inactive

When a user scrolls % down the page

✓ After scrolling up 'X' percent

Status

Inactive

When a user scrolls % up the page

- Also, you need to choose **‘Mobile’** as a Device type under the **‘Other options’** section.

OTHER OPTIONS

☐ Returning or new visitors

☐ Where visitor came from?

☐ Location targeting

☐ Show offer only if visitor visited 'X' pages

☒ Device type

Mobile

Learn how to set up your campaigns for different devices

NOTE: If you want to show your campaign on all devices, you need to create separate campaigns – one to be set for Desktop & Tablet, and the other one to be set for Mobile. Please, make sure you choose one of the mobile optimized designs, when you set up a campaign for mobile devices. Also, trigger options should be set to "All devices".

- Click the '**Save**' button at the top of the screen.
- For better performance, we recommend including the following line after the **opening tag**:

```
<meta content="width=device-width, initial-scale=1, maximum-scale=1" name="viewport"/>
```

NOTE: If you set up a campaign for mobile devices and desktops, make sure that the correct device type has been selected. In Device Type, Choose '**Mobile**' for mobile campaigns. To display your campaigns on desktops, select '**Desktop**.' You can also choose a tablet as a device type, either solo or in combination with the Desktop.

That is all about creating a mobile campaign in Picreel.
