

How to Manage Existing Campaigns

You can manage your campaign by following these steps:

1. Navigate to the Campaigns category by clicking *Campaigns* on the left side of your screen.
2. You may activate or pause a campaign by clicking on the arrow next to play icon.

3. To review details or modify any element of the campaign click the corresponding grey button below the conversions and impressions number. From this page you can make adjustments to campaign targeting or designs, see statistics or previews of overlays, and even clones or delete your campaign. Clicking the corresponding grey icon will take you into the detail page where each of these actions occurs.
