

How to Change the Default Time for Overlays in Design Editor

You can modify how long an overlay should be displayed after a user has accepted your offer. To change the default time, please, navigate to the *OPTIONS* section in the editor. In the field *How long to keep the message (in seconds)* change the value.

For example, “10” makes an overlay to be displayed for 10 seconds after a user has clicked on the submit button. A close message is displayed during this time. Click *Save* to save your overlay.
