

# How to Connect Picreel with dotdigital

You can connect Picreel to the dotdigital emailing service. It means that upon successful integration, all emails saved in the Picreel system will be redirected to dotdigital automatically.

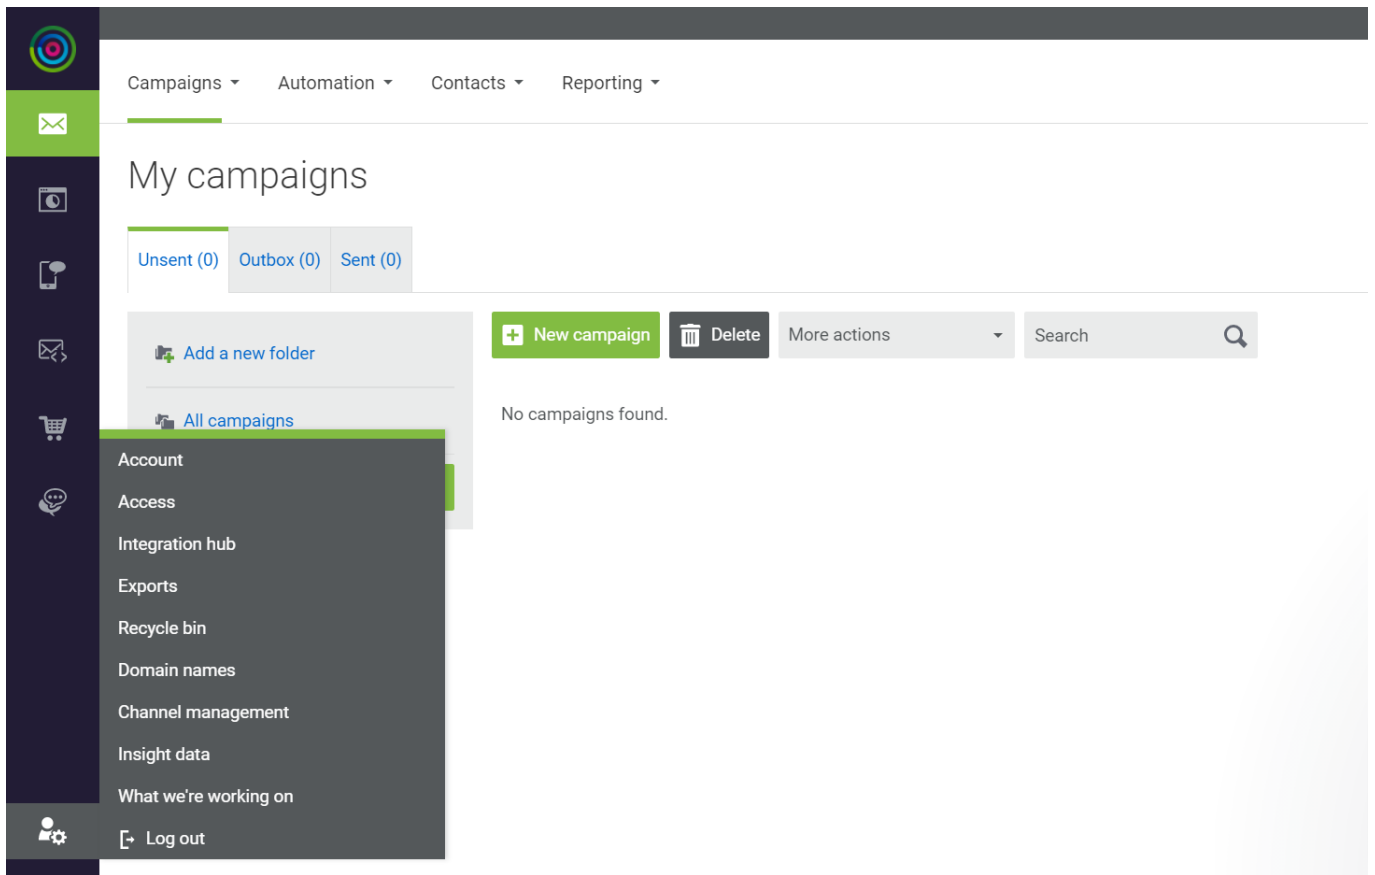

To **send** your leads to **dotdigital**, follow these steps:

1. Click on the **Leads** category on the left side of your screen in the Picreel account. There you can find emails entered via pop-ups.
2. Click the **Export to Apps** button and select the **dotdigital** icon in the popup window that appears.

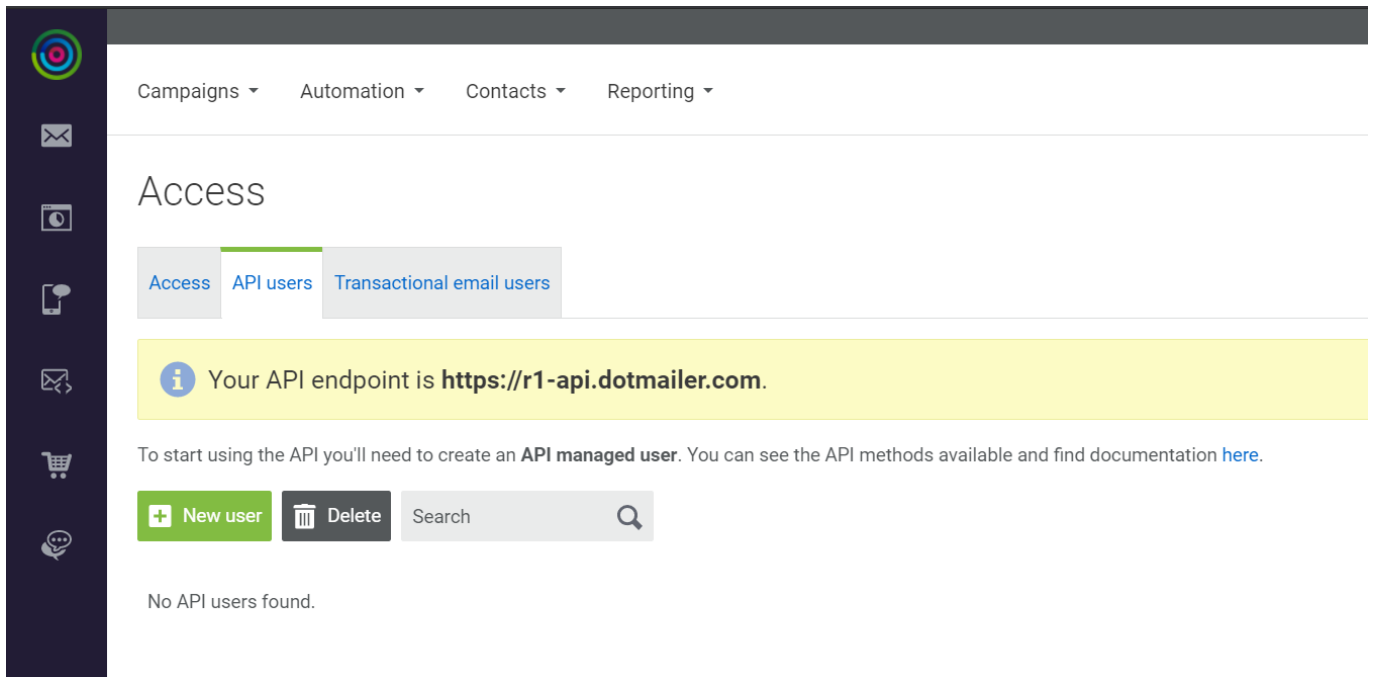

Paste the dotdigital data in the integration window: API endpoint, API managed email, API managed password and dotdigital Address book ID.

To locate this dotdigital data, follow the instructions below:

1. In your dotdigital account, click on the **gear** icon in the bottom left corner. Then click **Access**.

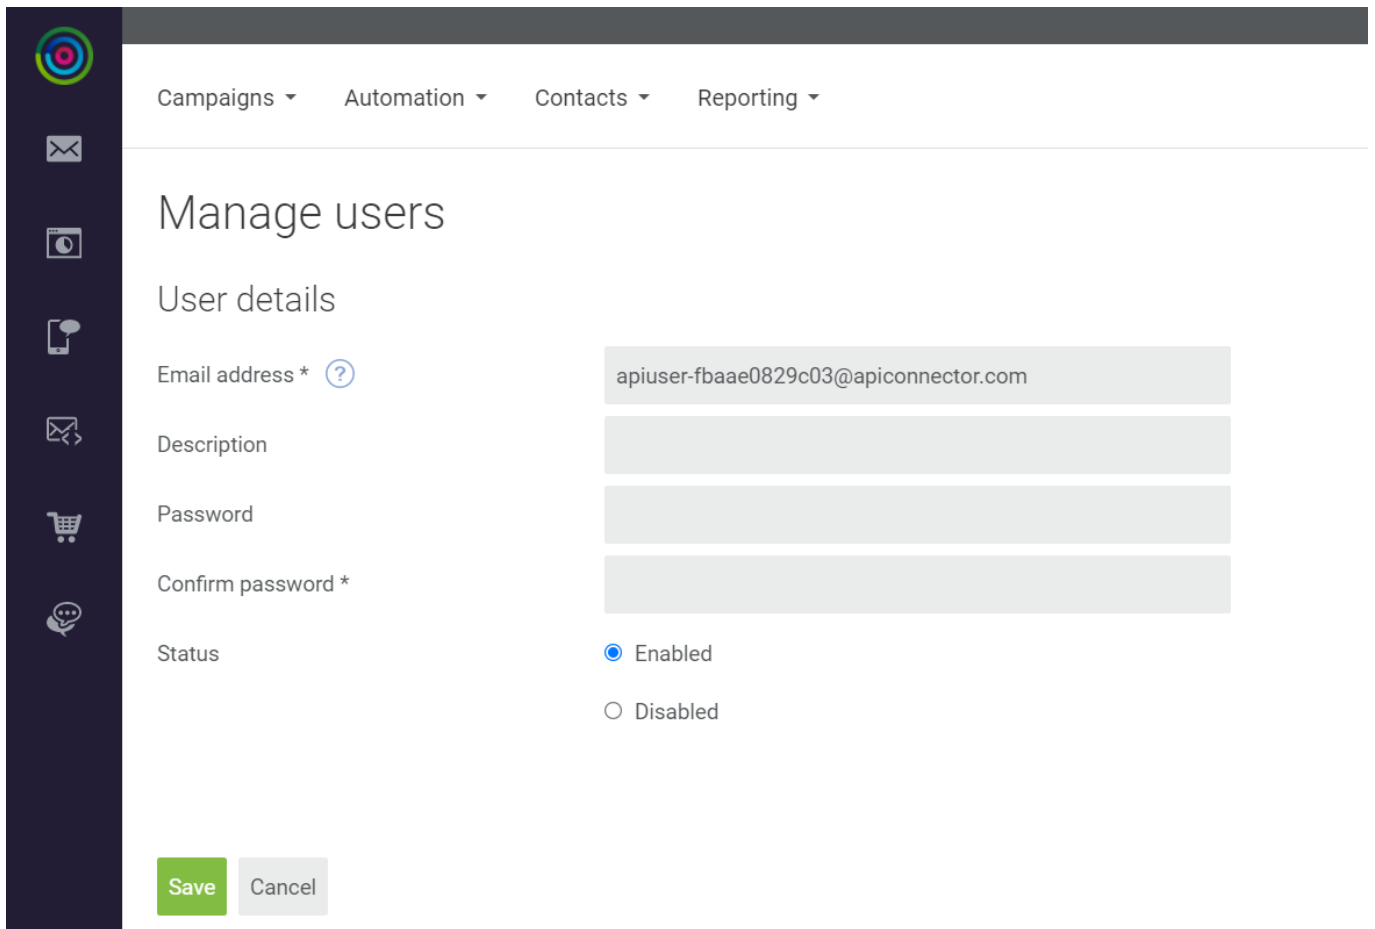

2. You'll see your API endpoint on this page. Next, click on **New User** to create a new API user.

3. When you create a new user, you'll see your API managed email and API managed password.

Set the password and click **Save**.
