

## How to Change Location of Overlays on Screen

Your popup designs can be placed anywhere on your web page -- in the corners, at the top, bottom, or in the middle.

To change the location of your mobile popup, simply open “*Options*” section and select the location.

HTML/CSS Editor

OPTIONS

Select action after event:

Close

Message:

How long to keep the message (in seconds)

☐ Show close button on close message
