

# How to Add Email Verification to an Overlay

You can improve the quality of your email list by verifying emails. Before your visitors click on call to action button, Picreel popup can tell if email they enter is real or not.

We integrate with [brightverify.com](https://brightverify.com) to verify emails. You'll need to have an account in [brightverify.com](https://brightverify.com).

To integrate with [brightverify.com](https://brightverify.com), navigate to *Design* of your campaign and open *HTML/CSS Editor* at the top of your Design step.

Scroll down till you see the code.

Paste this code after any line of code.

...where "your-api-key" is your API key of [brightverify.com](https://brightverify.com).

```
1 <!-- Important!!! Insert your HTML inside div ".container".
2 Please, do not delete it and such classes for elements like "submit", "redirect", "close".
3 Template will work uncorrect or not work at all. You can do it for your own risk. -->
4 <link href="//fonts.googleapis.com/css?family=Open+Sans:300italic,400italic,600italic,700italic,800italic,400,300,600,700,800" rel="stylesheet" type="text/css">
5 <div data-em="modal-container" class="container" data-template-type="collect-email">
6 <div class="logo-container" hide-logo">
7 
8 </div>
9 <div data-em="text-line-1" class="text-line-1">Wait, we have a special offer</div>
10 <div data-em="text-line-2" class="text-color">Enter your email and get 15% off!</div>
11 <div class="template-inputs">
12 <input name="email" placeholder="Enter Email Address Here" type="email" required="required">
13 <input type="hidden" name="elqFormName" value="Newcontactform">
14 <input type="hidden" name="elqSiteID" value="1623020901">
15 </div>
16
17 <button data-em="button" type="submit" class="submit btn-bg-color" id="submit-button">GET MY 15% OFF NOW</button>
18 <div data-em="modal-close-link" class="close close-link text-color" id="close-link">No, thanks. I'd rather pay a full price</div>
19 <script type="hidden" name="brightverify" value="1" data-apikey="your-api-key">
20 </div>
21 <input type="hidden" name="wrap_click_close" value="0"><input type="hidden" name="popup_size" value="{width:'800', height:'567'}">
```

When you're done, Picreel popup will check if emails are real before your visitors can hit your "Yes" button. If email is not real -- there will be a warning message to enter a valid email.
