

# How to Show Popups in Specific Locations

It's possible to filter your campaigns based on location of your web visitors. You can choose users of a certain country, who can and can't see your overlays. In order to do that, follow these steps:

You need to modify your Picreel code. Please, add this parameter to your code: `/?geo=1`. So, your code should look like that:

Or like this

Once the code is installed, go to *Targeting* of your campaign.

Open *Location* section. And choose where to show your popups.

```
xmp { line-height: 1; }
```
